LED Architectural Strip Light

NX-LAL4F-50W-L-DV-TCP

Specification

Product Name :	LED Architectural Strip Light
Model NO. :	NX-LAL4F-50W-L-DV-TCP-W (white) NX-LAL4F-50W-L-DV-TCPB (black)
Specification :	AC120-347V; 50/60Hz;
Wattage:	50W/40W/30W
Working Temp :	-20--+45(°C)
Power Factor :	>0.9
CRI(ra) :	>80
Color :	White Color / Black Color
Material :	Aluminum
Light Source :	SMD2835 LEDs
Lumen :	3450lm - 4600lm - 5750lm
Life Time :	50000 hrs
Beam Angle :	120°
Product Size :	L:48 in. x W:1.96 in. x H:2.75 in.
IP :	IP20
Application :	Office building, Shopping mall
Warranty :	5 years
Standard :	cUL, DLC
Color Temp :	3000K-3500K-4000K-5000K Tunable

NEXLEDS®

NEXLEDS LTD

SPECIFICATION

NEXLEDS®
NEXLEDS LTD

Feature:

1. Extruded-aluminum housing is well suited for open-plan space design.
2. Provides lighting distribution options of 70% Downlight 30% Uplight, 90% Downlight 10% Uplight, 100% Downlight.
3. CCT selected at 3500K/4000K/5000K, 3 wattages selectable.
4. LED Efficiency of 115 lm/w, typical 80 plus CRI.
5. Smooth Dimming 0-10V dimming standard, universal voltage: 120-347V.
6. Available with suspended installation and suspended continuous row-mounting installation.
7. Easy Installation – Suspended kits provide an easy and fast pendant mounting.

Product Dimension:

Function Description :

Power: 50W/40W/30W

CCT: 3000K, 3500K, 4000K, 5000K

Instruction:

Suspending installation -2FT4FT8FT(included)

Parts List

				
(2) Safety rope assembly	(2) Mounting fastener	(2) Anchors	(2) Screw	(5) Wire Nuts

NEXLEDS LTD

Installation instructions

1. Turn off the power.

2. Fixing the hook and suspending the lamp.

3. Adjusting the hanging rope length.

4. Use M5 square screw and M5 fixed head to fix LED strip light.

5. Open the end of the lamp to be connected. Two terminal

6. Cut off the corresponding terminals as required.

7. Turn off the power and wiring by using wire nut.

WHITE (NEUTRAL)
GREEN (GRD)

To Source
120V-277V/
120V-347V

8. Insert the terminal block and wires into the lamp housing.

9. The installation is completed and energize the luminaire to verify operation.

Instruction:

Ceiling box installation instructions

Parts List

						
(1) Ceiling box A	(1) Ceiling box B	(2) Mounting bracket	(4) Long screw	(4) Short screw	(2) nut	(4) Anchors

Installation instructions

1. Turn off the power.

2. Press the mounting bracket on the ceiling as shown, and mark the drilling holes with a marker.

3. Adjust the proper mounting distance and make another mounting bracket installation mark.

Mounting bracket

4. Drill the mounting holes according to the marked points.

5. Fasten the mounting bracket to the ceiling by screws.

Ceiling box
Safety rope assembly

7. Lead the wire from the ceiling through the cap disc round hole.

8. Lock the ceiling disc with short screws.

9. Press the wire lock to adjust the required installation height.

10. Screw the threaded cap into the mounting bracket on the light fixture.

11. Take out one end of the mounting plate as shown below.

12. Thread the input wire through the anti-tension connector.

13. Connect to the luminaire input.

14. Lock back mounting plate.

15. The installation is complete as shown in the following figure.

Instruction:

Splice installation instructions		Parts List
		
(1) Splice A	(1) Splice B	(6) screw

Installation instructions

1. Turn off the power. 	2. Remove the side cover and upper cover of both ends of the lamp to be spliced. 
3. Slide splice B into contact with the positioning bracket and lock the screws. 	4. Remove the side cover and upper cover of both ends of the lamp to be spliced. 
5. Install the luminaire on the ceiling according to the lifting installation instructions. 	6. Remove the screws of the lifting bracket on the lamp to adjust the position of the lamp when splicing. 
7. Pull the splicing A on the splicing B between the two lamps.  120V: The maximum connection can be 40ft, and the connection 24-40ft requires the use of a diffusion mask. 347V: The maximum connection can be 100ft, and the connection 24-100ft requires the use of a diffusion mask. 	8. Cut the corresponding terminal at the end to be connected as required. Reinstall the side cover and upper cover, lock the screws of the lifting bracket.  Three-position terminal: BLACK (LINE) WHITE (NEUTRAL) GREEN (GND) Two terminal: PURPLE (DIM +) PINK (DIM -)
9. Connect cables according to requirements.  BLACK (LINE) WHITE (NEUTRAL) GREEN (GND) To Source 120V-277V DIM-347V Dimming	

Up/down light line lamp wall installation instructions

Parts List			
			
(2) Mounting plate A	(2) Mounting plate B	(1) Decorative plate	
			
(8) Long screw	(6) Short screw	(8) Anchors	(1) Anti-stretch head

Installation instructions

1. Turn off the power. 	2. Pull out the wire and lock the trim. 
3. Install wall mounting piece A to the wall according to the length of the luminaire.  Recommended installation distance: 4FT: 800-1000mm 8FT: 2040-2240mm	4. According to the installation distance of the wall mounting part A, mount the wall mounting part B on the lamp. 
5. Insert mounting plate B on the light fixture into mounting plate A on the wall. 	6. Remove one end screw of the lamp to pry open the wire hole. 
7. Cut off one end of the terminal as required for wiring.  Three-position terminal (yellow): BLACK (LINE) WHITE (NEUTRAL) GREEN (GND) Two terminal: PURPLE (DIM +) PINK (DIM -) To Source 120V-347V Dimming 	8. Installation complete.

GREEN (GRD)
Two terminals (orange) : PURPLE (DIM +)
PINK (DIM -)

10. Cover back to top cover as required.

11. Lock back lamp upper cover and side cover.

12. Connect the wire as required.

13. Installation completed, light trial run.

Instruction:

1 Remove the cover from "V60" joiner.

2 Remove the end cap and upper cover from fixture.

3 Slide the splicing bracket B into locating piece, then lock it with screws.

4 Make the mounting marks on the ceiling for fixtures, please refer to pendant mounting instructions for suspending the fixture.

5 Insert the "V" joiner into the fixture as shown below, and pull the lock buckle to splice the fixtures.

6 Make electrical connection with male-female connectors.

7 Cut off the connectors in one end for wiring to line voltage

8 Screw back the cover of "V" joiner, lock back the fixture upper cover, Lock back the other end of fixture upper cover

9 Make wiring according to diagram

10 Installation completed.

Instruction:

1 Remove the cover from "V"joiner.

2 Remove the end cap and upper cover from fixture.

3 Slide the splicing bracket B into locating piece, then lock it with screws.

4 Make the mounting marks on the ceiling for fixtures, please refer to pendant mounting instructions for suspending the fixture.

5 Insert the "V" joiner into the fixture as shown below, and pull the lock buckle to splice the fixtures.

6 Make electrical connection with male-female connectors.

7 Cut off the connectors in one end for wiring to line voltage

8 Screw back the cover of "V"joiner, lock back the fixture upper cover, Lock back the other end of fixture upper cover

9 Make wiring according to diagram

10 Installation completed.

Applications:

Note:

1. The installation and maintenance must be completed by electricians or professionals.
2. Please cut off the power before installation and maintenance.
3. The thermally insulating material is not allowed to cover the fixture.
4. Please keep away from the corrosive substance, and keep the fixture dry and clean.
5. Working temperature: -4°F~113°F, storage temperature: -22°F~140°F.

Important:

Read this instruction carefully before installation. Keep it for further reference.
 Make electrical and grounded connections in accordance with the national electrical code and any applicable code. Always turn off the power supply before installation.
 This product must be installed in accordance with the applicable installation code by a qualified electrician who is familiar with the construction and operation of the product and the hazards involved.

Warning:

- ⚠ Risk of fire or electric shock. Fixture installation requires knowledge of luminaires electrical systems. If not qualified, DO NOT attempt installation. Contact a qualified electrician.
- ⚠ Risk of fire or electric shock. Suitable for wet locations. Always turn off the power supply before installation.
- ⚠ Risk of fire or electric shock. Suitable for non-insulated surface and frame. DO NOT cover fixture with insulation line or similar material.
- ⚠ DO NOT install fixture on unstable, loose or easily breakable surface.
- ⚠ DO NOT exert force on the surface of the fixture.
